

## 39-41mm Fork Mount Driving Light

**Rice Lake, WI - Big Bike Parts®** combines its popular and bright 50 watt halogen die cast driving lights with its new 2 piece fork clamps. This kit gives a great custom look to fit 39 to 41mm forks, such as Honda Fury and Statelines, Kawasaki VN900 or Yamaha VStar 650/1100. The 50 watt halogens are amazingly bright and have rotatable bezels that allow these lights to be mounted at multiple angles. Their 8mm mounting stud allows precise aiming and adjustment. Kit comes complete with clamps, lights, wire harness, switch, and relay to protect the bikes circuitry.

The fork clamps can be ordered separate, BBP # [22-141](#), to be used to mount turnsignals such as [16-111A](#), [16-118A](#), or [16-114A](#) LED turnsignals.

**39-41mm Fork Mount Driving Light**  
**BBP Part # 55-364**                      **Suggested List \$189.95**
